SUMMARY

Senior Data & Business Analyst with 6+ years of experience in business intelligence, analytics engineering, and data-driven decision-making. Specialized in building KPI frameworks, automated dashboards, and translating complex data into executive-level insights.

Proven track record designing scalable reporting solutions, implementing analytics tracking, and enabling organizations to improve performance, engagement, and strategic outcomes. Strong experience working with cross-functional teams and stakeholders.

Skilled in SQL, Looker Studio, Tableau, Power BI, and Google Analytics (GA4), with a focus on data storytelling and actionable insights.

WORK EXPERIENCE

Business Analyst | Data & Analytics, 05/2023 - Current Banco Internacional

- Built a company-wide KPI and reporting framework from scratch, enabling data-driven decision-making for the Innovation area.
- Designed 20+ dashboards for cross-functional teams (Innovation, Fraud, Sales, Product), improving visibility for executive stakeholders.
- Implemented analytics tracking using Google Tag Manager and GA4 (event design, tagging, validation) to measure performance and user engagement.
- Defined KPIs and translated data into actionable insights, supporting strategic decision-making for senior stakeholders.
- Worked in agile squads using Jira and Confluence, creating user stories, process flows, and MVP definitions.
- Automated data pipelines and ensured data quality; conducted functional testing (QA) for analytics and product initiatives.

Data & Business Control Analyst, 09/2021 - 04/2023 Lucas Diesel

- Built the data analytics function from scratch, improving visibility across operations previously limited by shared financial structures.
- Delivered 30+ Power BI reports across operations, sales, inventory, and executive dashboards, enabling data-driven decision-making.
- Automated reporting processes, saving 1+ hour daily, and improved annual budgeting timelines from 6 to 2 months.

Financial Performance Analyst, 11/2019 - 02/2021 Heavenward Ascensores

- Tracked KPIs and costs for modernization projects.
- Created dashboards in Excel and Power BI to support strategic decisions.
- Worked with technical and executive teams to improve customer data insights.
